Discussing and Learning facts about the animals that start with the letter

A

Guess what animal is this?

Where does it live?

What does it eat?

Have you seen it?

Fun facts about the ants:

A single ant can carry 10 times its own weight

Guess what animal is this?

Where does it live?

What does it eat?

Have you seen it?

**Fun facts about the alligators:
Alligators can't eat salty food**

Guess what animal is this?

Where does it live?

What does it eat?

Have you seen it?

Fun facts about the anteaters:
Anteaters Have No Teeth

Guess what animal is this?

Where does it live?

What does it eat?

Have you seen it?

Fun facts about the albatross:
Albatross has the largest wingspan of any living bird.

Sad fact about the albatross:
They are threatened with extinction because of excessive fishing and pollution of the seas and oceans with plastic

Guess what animal is this?

Where does it live?

What does it eat?

Have you seen it?

Do you know some fun facts about it?

**Fun facts about the armadillos:
Armadillos are covered in tick bony shells that create their 'armour'.**

The Ants and the Grasshopper

One bright day in late autumn a family of Ants were bustling about in the warm sunshine, drying out the grain they had stored up during the summer, when a starving Grasshopper, his fiddle under his arm, came up and humbly begged for a bite to eat.

"What!" cried the Ants in surprise, "haven't you stored anything away for the winter? What in the world were you doing all last summer?"

"I didn't have time to store up any food," whined the Grasshopper; "I was so busy making music that before I knew it the summer was gone."

The Ants shrugged their shoulders in disgust. "Making music, were you?" they cried. "Very well; now dance!" And they turned their backs on the Grasshopper and went on with their work.
